

Staff Impression: Presley

Presley has great, dark brown hair with beautiful green/brown, almost honey-like eyes that sparkle even more when he smiles, exposing straight brilliant white teeth. He is average height with a fit/slender build which is in part to his years in dance including: jazz, ballet and contemporary. He has a prominent jaw line with medium bone structure over very pretty, smooth olive skin.

Presley is incredibly talented in multiple areas. One of his hobbies includes producing music; in fact he can play eight different instruments including acoustic, bass and electric guitar as well as cello, viola, drums and keys. Aside from being musically talented, he knows a bit of French and is advanced in mathematics including calculus and static physics. Presley is currently enrolled in college working towards his Aerospace Engineering degree with a goal to work for NASA one day, helping to engineer one of the ships that populates the surface of planets.
