

Decker Staff Impression

Decker has thick, black, hair and dark brown eyes that crinkle when he smiles. He has a medium complexion that tans easily. His broad smile is both genuine and welcoming. He is fit and slender from staying busy with home improvement projects, playing with his dogs and children, and participating in a large variety of recreational sports including soccer, volleyball, and swimming.

Decker is a thoughtful and caring family-man who is excited to be able to help others have children. His delightfully energetic and optimistic personality lights up our office when he visits. He has a genuine curiosity and interest in learning about the people he meets and the new hobbies he is introduced to. Although he is an introvert, he is fun and adventurous with a love of travel and karaoke as well as being comfortable holding a lively conversation. He is a great donor option for anyone looking for a happy and well-rounded person.
